

Notice of Disclosure

The Academy has provided MEAP, Scantron and Single Record Student Database ("SRSD") data to the requester and charter authorizing agent, Central Michigan University – The Center for Charter Schools ("The Center").

The Center has requested access to MEAP and Scantron data for purposes of compiling reports and preparing studies of testing data. This will aid The Center in determining whether academies are achieving academic performance and progress goals, including meeting the requirements of the adequate yearly progress standards set forth by No Child Left Behind Act of 2001(NCLB). The Center also intends to use this data to compile reports for internal use in monitoring academies. Such reports contain aggregate data only, and are not used to classify students on any identifiable characteristics such as race, gender, or socioeconomic status.

The Center has requested SRSD data for purposes of compiling reports and preparing studies to determine whether students and academies are achieving academic performance and progress goals under the charter contract and applicable law. The Center intends to use this data to compile reports for internal use in monitoring academies. Information such as students' race or gender may be included in these reports.

Note: The Center has established security processes in place which include, but are not limited to, the limited access of raw student data to assigned personnel. Assigned personnel strip the raw student data of personally identifiable information prior to any testing and studies.
